Class 9 29.04.27	1915 – 2100	Reaction to stings Tea break Film and introduction to extracting equipment and what the association holds for hire. General discussion on the course and the way forward.	Committee

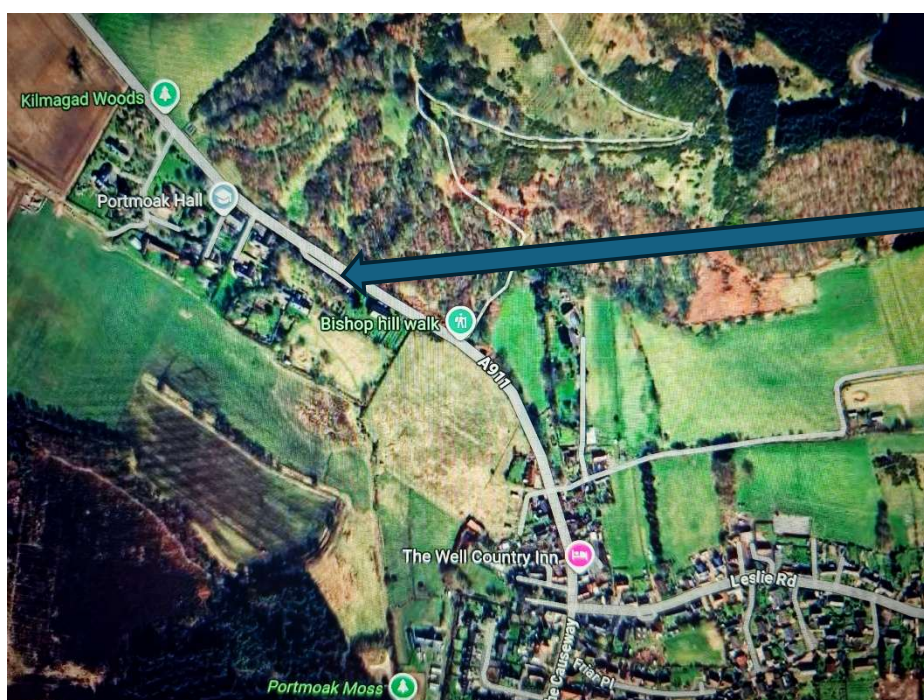

Note that we open the hall at 1900 hours to put out chairs etc. The programme starts at 1915 hours with the lecture starting at 1930 hours prompt. There will be equipment relevant to the evening's subject on display so you can browse between 1915 and 1930 and during the tea break. Beginners books will be on sale or available to order.

Please bring your own mug for tea/coffee/biscuits at the break.

The break out sessions are when the participants form small groups headed by an experienced beekeeper. This allows questions to be asked and a general chat getting to know one another. We still encourage questions during and after a lecture.

On the first Thursday of the month (ending April) there will be an association talk. We encourage you to attend these talks as it gives you the opportunity to meet other members of the association. One never stops learning and by attending these talks you always pick up something new or a tip.

Arrive in plenty time to park your vehicle and walk the short distance to the hall.
